Disclaimer of liability

The election newspaper was produced by the election committee - elected by the AStA of the TUHH on behalf of the student parliament - in accordance with Section 12 of the election regulations.
The respective candidates are responsible for the pages of the lists, the submitted images and election texts.

The election process

By using your voting rights, you are helping to represent the current interests of the student body. You can choose those representatives in the FSRe or the StuPa and AntiRa who best enforce your ideas of good representation.

In the following you will find some important information about the election process and the correct ticking of the ballot papers.

If you have not registered for the postal vote, you will be able to vote on December 1st, 2021 from 9:00 a.m. to 6:00 p.m. in the foyer in front of Audimax II (above the cafeteria).

Our electoral officers will always help you to wait in front of the voting booths in compliance with the hygiene requirements.

Please bring your student ID, certificate of enrollment or your semester ticket with you.

You will then be given 3 ballot papers, which you fill out in a voting booth:

1. A white A4 sheet for the StuPa election. There you can place a total of 13 crosses. Either directly for one or more lists, or you give crosses for individual candidates (max. 1 cross) who particularly appeal to you.
2. A colorful, elongated piece of paper for your FSR. Here you can select up to 12 candidates who will then represent the interests of your student body for the next year.
3. A small white slip of paper for the election of the semi-autonomous unit for anti-racism (AntiRa). The AntiRa unit will deal with the important issue of racism at our university. Here you can decide whether you want to take part in the election or not. This choice is mainly aimed at students who have had direct experience with racism, have a migration background or are non-German citizens.

Finally, you throw the papers into the corresponding ballot boxes and then leave the building.

Thank you for participating in an active and lively university policy.

Who are we?

DAS ASOZIALE NETZWERK

And what are we going to do?

- More security on campus
- Outdoor seating and workplaces
- Lord, it's time - for sustainability
- > And everything you ask of us!

Our mission statement from the chapter "To Yemen":

ICH ARBEITE GERN — FÜR DEN UNIKONZERN
(I like to work - for the uni corporation)

How do we want to do that?

With your voice you can throw us into the StuPa and we imitate the big parties and stay to our promises like them

DIE LISTE

Die Ersatzteilliste

Hi.

At the moment **many seats in the StuPa remain empty**, because no one bothered to run for them.

This sucks, because without enough members the StuPa is **unable to work properly**.

That's why we founded this list.

We promise

- to be present in meetings.
- to decide by spinning a bottle in case of nonsensical votes.
- to submit an application for recliner seats in the Audimax.
- to keep our promises.

Please only vote for us if all other options are shit.

1. Main **Björn Wohltmann** (B.Sc. Maschinenbau)

I'm lacking the english skills to translate my election slogan properly.

Do not vote for Henrik!

1. Deputy **Frederick van der Weck** (B.Sc. Maschinenbau)

Hello,
I study mechanical engineering in the 7th semester and was already
in the StuPa.

Don't vote Frederick!

2. Main **Henrik Schwägermann** (B.Sc. Mechatronik)

Committee work isn't broccoli.

Don't vote for loverboy Lukas!

2. Deputy **Nils Nörenberg** (B.Sc. Maschinenbau)

No cross at Leonard!

3. Main **Lukas Thiesen** (B.Sc. Maschinenbau)

Moin,
I wear pink sunglasses and light tornados.
Don't vote for Carl!

3. Deputy **Leonard Sommer** (B.Sc. Maschinenbau)

Hi, my Name is Leonard and i am studying Mechanical Engineering
in the third semester .
Do not vote for Andy!

4. Main **Carl Sonnabend** (B.Sc. Maschinenbau)

Do not vote for Björn!

4. Deputy **Andy Martin** (B.Sc. Maschinenbau)

My motivation is trivial and is left to the affectionate audience as an
exercise.

Furthermore do not vote for Frederick vdW.

Freiheitliche Fliesentisch-Fraktion

We, the Freiheitliche Fliesentisch-Fraktion, are a group of Chemical Engineering and Renewable Energies students. We want to be the voice for you in the student parliament.

Our Topics:

- Improvement of the learning space situation
- For cheaper meals and a broader choice of meatless meals at the Mensa
- Stricter control of the AStA
- More transparency at the TU
- For a better infrastructure in learning and lecture rooms
- Your suggestions?

1. Main **Dennis Espert** (B.Sc. Verfahrenstechnik)

Hi,
I'm Dennis and I was elected into the StuPa and FSR VT for the last 3 years.
The coming year I would like to improve the StuPa with the goals we listed.

1. Deputy **Eric Nitschke** (M.Sc. Regenerative Energien)

Moin!
During the three years that I've been working in student committees I've been part of committees such as the FSR VT, the academic senate and the examinations board EUT. As Dennis' substitute, with whom I've already worked together in the StuPa beforehand, I am aiming to support him in working on the various problems of the learning space situation and on establishing the StuPa again as a serious supervisory committee.

2. Main **Jan Einax** (B.Sc. Verfahrenstechnik)

2. Deputy **Janine Berg Zuniga** (B.Sc. Verfahrenstechnik)

Hi,
my name is Janine and I have been in the student representation for 8 semesters. I was elected as an FSR member and was active in a multitude of student positions. I found some people to take action with because a few things really need improvement at this university. As a StuPa List we will try to get some benefits for all the students in this situation.

8 **Everybody needs to feel safe on campus**

Strengthen safety measurements at the TUHH

9 **Transparent valuation**

Strengthen students rights at exam reviews

10 **No disadvantages over UHH and HAW**

Office365 campus license for better collaboration

1. Main **Kilian Kurz** (B.Sc. Maschinenbau)

Moin, my name is Kilian and I study mechanical engineering at the fifth semester. With the new "liberale Liste" we want to bring a vote for freedom to the StuPa. Crucial for us is that it stays unpolitical and focuses on the problems students have. For me personally it is essential to minimize the impact Covid has on studying. All courses should be offered on campus as well as online and with recordings. Furthermore students rights at exam reviews should be strengthened. To stand up for your concerns we need you to raise them - so feel free to contact us.

1. Deputy **Lennart Rosenbrock** (B.Sc. Maschinenbau)

Moin, my name is Lennart and I am in my fifth semester of mechanical engineering. With the new „liberal list“, we want to work for a transparent and future-oriented university policy. For me personally, the digitalisation of university life is particularly important. The introduction of a digital student card, which combines a semester ticket, student card, library card and canteen card, is therefore a high priority for me. A campus licence for Office 365 will also give everyone the same conditions for easy digital collaboration. So that we can really deal with your concerns, we would be very pleased if you would contact us.

I would like to continue to be active in our FSR, to represent our interests and to organise some events in the future. If you have special requests or suggestions for improvement of any kind, please contact me or any other FSR-member. After all, we are here to represent all interests, not just our own.

Bjarne Wellm (Allg. Ing.wissenschaften)

Vote me, for a hopefully mostly normal and fun study time!

Hans Christian Rosenkranz (Allg. Ing.wissenschaften)

My name is Hans, I'm 19 years old, in my third semester and I really want to make a difference here at the university. Besides the university, I kitesurf a lot and am always sporty. I am already active in the FSR since last semester as a non-elected member and would like to be one of the elected members this semester to represent you and to implement and start new projects. Without me, no we.

Hello all!
My goals... I don't have any concrete goals. I only want to offer possibilities to come to the FSR for questions, ideas and suggestions, which I try to implement as far as possible. To make this possible for you, communication is the most important thing. Not only to you, the students, but also to the other committees (e.g. AStA, StuPa etc.). This is the only way to change things and work against problems (e.g. shortage of learning space).

In the first few weeks of my studies, I learned a lot about the work of the FSR-GTW.

I find good togetherness, across disciplines and courses, as well as working with the university and the associated opportunity to help shape and change the courses and life at the university, which is very appealing. I want to be able to help people, to be able to establish communication between students and lecturers, to be able to plan events and thus to enable everyone to have an unforgettable, but also very instructive time.

FSR MB

Björn Wohltmann (Maschinenbau)

Well, I had fun last time, so ... vote for me again I guess?

Carlos André (Maschinenbau)

I have been a member of the FSR MB since my 2nd semester. For one semester, I've also had the job of financier in the FSR. So I already have a little experience with. If you haven't heard from me yet, I guess I haven't made a big mistake in my job. If I should keep doing this you would have to choose me.

Charlotte Stein (Maschinenbau)

Describing myself I would say I am an empathic, involved and full of life. With these things I would like to support the FSR. We all have these moments in our studies when we struggle. I for sure have. But I want to help others the same way they somebody helped me. Because after a coffee or tea break while walking a little bit nothing looks as bad as before. Even though I am at times all over the place I am very responsible. Whenever there is something to do I will be there to help. I would like to organize more events for meeting new people. Events that just make a lot of fun. The last semesters we just had to less of those. What is missing in the FSR? A Charlie of course. 🤔🤔

Stephan Fischer (Mechatronik)

I will make sure, that we will steal the flags of other student committees (FSRs) more often, to secure a significant amount of free beer for the whole next winter, so we can atleast survive for the next semester.

For this we will put all students in mechatronics and mechanical engineering together to invent a teleportation device to get into the rooms. This works due to the fourth spacial dimension, to which direction the other student committees probably didn't seal off their rooms. All opportunities will stand open as to what we will do after draining the drink budgets of all others, if we succeed in our endeavour. Probably steal beer from the next drink store, who knows?

Swantje Debbeler (Maschinenbau)

Moin!

I've been an active member of the FSR for three years and for the last two of those years I've been a member of the board. My main tasks during that time were amongst other things the restructuring of "Energy and Environmental Technologies" into "Green Technologies", the management of the lab coat sales and this year the realization of the orientation trip (OE-Fahrt). I would love to continue my work for the FSR and (if the situation allows it) to start planning some more events for our students again!

Frederika Alice Kern (Verfahrenstechnik)

Henry Wiedenroth (Energie- und Umwelttech.)

Hello,

I am going to be honest with you. I don't know a whole lot about current Topics or controversies at our Uni, however that's exactly the Point why I am running for the FSR! Through joining the FSR I want to know more about what the students of our student council are interested in, what could be going better and what bothers them. That's why I am running for this Position and hopefully make a difference at our university and naturally try to make studying at our university more enjoyable! So in conclusion what I lack in knowledge I make up in engagement and thirst for knowledge! :)

Janine Berg Zuniga (B.Sc. Verfahrenstechnik)

Hello,

I am in the FSR since my 3rd semester. I've been your representative in the examination committee (Prüfungsausschuss). The Corona situation forced me to not candidate last semester, but this time I want to be active for you again.

Only time will tell if we stand the test of time - Van Halen

Johanna Spansel (Energie- und Umwelttech.)

In the FSR I would like to be there for you 24/7 - doesn't matter if it's storing away the equipment from our bbq's the next morning at 6 am, debating in the StuPa until 9pm or publishing the newsletter at 1am in the night. I am fully invested for you and your interest!

Kathleen Wolf (Energie- und Umwelttech.)

Moin! If I'm elected I would like to keep you up to date on Instagram, make sure that there will be more VT memes and try to make your life as a student less difficult.

Lilian Block (Energie- und Umwelttech.)

Hi! I'm Lilian and I have been an elected member of the FSR for 4 semesters.

"The answer to the Ultimate Question of Life, the Universe, and Everything... 42!"

Sorry, it doesn't get more creative :D

Maik Badtke (Bioverfahrenstechnik)

Hey there I am Maik, kind, quite relaxed and a Fulltime-Professional-Idiot.

And i am here to represent exactly people like us. It would be an honour to soon be one of the driving forces of the FSR-Team and help to create and host their helpful as well as entertaining Opportunities.

So vote for me if you'd like to have a laid back and approachable Spokesperson.

Niklas Hartmann (B.Sc. Bioverfahrenstechnik)

Encourage to vote

Nils Cunow (B.Sc. Bioverfahrenstechnik)

What Niklas says and always be against Sven.

Rebecca Burow (Green Technologies)

For more study rooms and an equivalent education at the TU with skilled professors.

Sven Opitz (Energie- und Umwelttech.)

If you vote for me - your fault

Bhavatharini Suresh (M.Sc. Environmental Engineering)

Antirassismus ist ein wichtiges Thema, über das sich jeder bewusst sein muss. Besonders an Universitäten, wo Menschen aus der ganzen Welt studieren, ist es wichtig, einen sicheren Ort zum Lernen zu schaffen. Als Teil von AntiRa möchte ich versuchen, an unserer Universität einen sicheren Ort für Studierende zu schaffen, an dem sie sich äußern können, wenn sie Rassismus jeglicher Art erleben, und ihnen helfen, ohne Vorurteile eine Lösung zu finden.
